Neu-Isenburg  
September 2021

## **JOST with many innovations at NUFAM 2021**

**At NUFAM 2021, which will take place in Karlsruhe from 30<sup>th</sup> September to 3<sup>rd</sup> October 2021, JOST will present innovative new products and sustainable further developments, in addition to its wide-ranging product program with components and systems for commercial vehicles. Special highlights of the exhibition stand are the Drawbar Finder, the KKS automatic coupling system and the ZGA command steer axle with the EF-S electronic steering system.**

ROCKINGER, which has been part of JOST World for twenty years, will present the latest innovation in form of the Drawbar Finder: Here, a camera sits above the trailer coupling overlaying its image with auxiliary lines for the driver in the sense of augmented reality. The visual guidance in two directions, horizontally and vertically, enables precise coupling which increases efficiency and helps prevent accidents.

Narrow depots, winding city streets and a 16.5 m long tractor trailer that needs to be steered safely – this is where conventional axle systems reach their limits at the latest and the use of a command steer axle is required. The new JOST ZGA can be used with all common steering systems, whether mechanical, hydraulic or electronic, and impresses with outstanding performance features such as the low steering radius. At NUFAM, JOST will be showing the ZGA combined with the TRIDEC EF-S electronic steering system. Up to three JOST ZGA axles can be used. The steering angle can be easily adapted to the available space for installation and the required maneuverability.

There will also be live demonstrations of the new KKS automatic coupling system. Launched in spring 2021, the KKS enables the driver to perform the coupling and uncoupling of the semitrailer automatically, quickly and safely from the cab by remote control. Efficiency, comfort and safety gains are made possible with just one product. KKS thus represents the future of logistics and is an important step towards autonomous driving.

JOST presents its innovations and proven products at NUFAM 2021 in hall 2, stand C 202 and with live demonstrations on 30<sup>th</sup> September and 1<sup>st</sup> October in the Demo Park.

About JOST:

*JOST is a leading global producer and supplier of safety-critical systems for the commercial vehicle industry. Under the umbrella brand JOST, the comprehensive range of products is divided into systems for the road and agriculture:*

*The JOST brand includes fifth wheel couplings, landing gears, ball bearing turntables, kingpins and container locks as well as components for alternating systems. Trailer axles and truck axles are also sold under the JOST brand. The core products of the traditional brand ROCKINGER are towing hitches, drawbar eyes and drawbars for both transporters and trucks. TRIDEC offers steering systems and axle suspensions for trailers.*

*ROCKINGER products are also for use in the agricultural industry. The new brand Quicke has been part of the JOST World since February 2020 and specializes in agricultural front loaders and implements.*

*JOST currently employs more than 3,000 staff across the world and has sales and production facilities in more than 20 countries on all five continents. The company is listed on the Frankfurt Stock Exchange since 20 July 2017. For more information about JOST, please visit [www.jost-world.com](http://www.jost-world.com).*
